EDUCATION

Northeastern University Jan 2025 – Dec 2026
Master of Science in Computer Science *Boston, MA*

M. S. Ramaiah Institute of Technology Aug 2017 – Jul 2021
Bachelor of Engineering in Computer Science *Bengaluru, India*

TECHNICAL SKILLS

Languages:	Python, Java, Go, JavaScript, TypeScript, C, C++, SQL
Backend:	Spring Boot, FastAPI, Flask, Django, Node.js, Express.js, REST APIs, Apache Kafka
Frontend & Databases:	React, Redux, Next.js, PostgreSQL, MySQL, MongoDB, Redis, pgvector
Cloud & DevOps:	AWS (Lambda, S3, EC2, ECS, ECR, IAM, CDK), Azure, GCP, Docker, Kubernetes, Terraform, Linux/Unix
Tools & Testing:	Git, Jenkins, GitHub Actions, JUnit, Mockito, PyTest, Playwright, AWS CloudWatch, Prometheus, Grafana

EXPERIENCE

Amazon Web Services (AWS) Jun 2026 – Aug 2026
Software Development Engineer Intern *Boston, MA*

- Designed and built an end-to-end serverless prototype in Java and Python that automatically captures visual evidence for cloud security workflows, using AWS Lambda, S3 and browser automation.
- Defined the infrastructure as code with AWS CDK, IAM and Docker, and made the service fault tolerant through input validation, timeout handling and built-in observability.
- Achieved **100% test coverage** on the Java evidence collector, unit tested the Python Lambda, and built an end-to-end integration suite that validates success and failure paths against a live AWS environment.

Khoury College of Computer Sciences, Northeastern University Sep 2025 – Dec 2025
Graduate Teaching Assistant, CS5010 Programming Design Paradigm *Boston, MA*

- Mentored **300+ graduate students** in labs and office hours on Java OOP, SOLID principles, UML and design patterns, and reviewed their code and unit tests (JUnit, JaCoCo).

Schneider Electric Feb 2021 – Nov 2023
Digital Workplace Engineer *Bengaluru, India*

- Designed and built internal workflow applications in Python/Flask, React, Node.js and MySQL used by **10,000+ employees**, and cut API response times by **30%** through SQL query optimization and caching.
- Automated Microsoft 365 administration and migration workflows with Python, PowerShell, Microsoft Graph API and Azure AD, cutting manual effort by **60%**.
- Containerized backend services with Docker and Kubernetes, built CI/CD pipelines in Jenkins and GitHub Actions, and added Prometheus/Grafana monitoring so releases stayed consistent and issues were quick to trace.
- Won the **Surge award**, Schneider Electric's highest employee recognition, for building the Box Archive document platform.

SELECTED PROJECTS

Ticket-Forge | ***3rd Place, Google – MLOps Project Expo*** 2026
Python, FastAPI, PostgreSQL, pgvector, Airflow, MLflow, Docker, GitHub Actions

- Built an ML-driven recommendation engine that matches software tickets to the best-fit engineers using ticket context, engineer profiles, assignment history, workload and recent experience, cutting down manual triage.
- Implemented pgvector similarity search with confidence scoring, explainability and cold-start recommendations, and ran ticket-replay and evaluation pipelines on Apache Airflow with MLflow experiment tracking.
- Presented alongside **28 other teams** at **Google's Cambridge, MA office** during Northeastern's MLOps Project Expo.

ExpenseShare 2025
React, Node.js, Express.js, MySQL, REST APIs

- Designed and built a full-stack expense-sharing platform with a normalized relational schema and REST APIs covering users, groups, expenses, settlements and balance tracking.
- Implemented stored procedures, triggers and ACID transactions to keep balances consistent, sped up queries with indexing and pagination, and shipped real-time updates backed by automated tests in CI.

Allocation Optimization of Medical Samples for Distributed Testing 2021
Python, Mixed Integer Programming, React

- Developed a Mixed Integer Programming model that minimizes distributed sample testing costs; **published in IEEE Xplore**.

LEADERSHIP & CAMPUS INVOLVEMENT

Treasurer, AWS Builders at Northeastern: Manage club finances and help organize AWS workshops May 2026 – Present
Residential Security Office Proctor, Northeastern University: Monitor access and assist residents Oct 2026 – Present
